## TECHNICAL SKILLS

| | |
|---|---|
| **Certified** | **AWS Certified Solutions Architect Associate** |
| **Experienced** | JavaScript, TypeScript, AWS, Node.js, Azure |
| **Intermediate** | React, Terraform, Python, Postgres, Docker, OpenShift, Kubernetes, Splunk, Java |
| **Learning** | Go, Rust, Kotlin |

## EDUCATION

**University of Wisconsin - Madison**                                      2013 - 2016
*Bachelor of Science, Computer Science*                          *Madison, Wisconsin, USA*

- **Major:** Computer Science
- **Related Coursework:** Algorithm & Data Structures, Operating Systems, Networks, Computer Vision, Computer Graphic, Artificial Intelligence, Mobile App Development

## EXPERIENCE

**Spark New Zealand**                                                   Dec 2021 - Now
*Software Engineer*                                                       *Auckland, NZ*

- Member of a larger mobile app squad that's responsible for the Spark mobile app (iOS & Android), contribute to **server-driven UI** delivered through **RESTful API** in **Node.js** and **TypeScript**.
- Collaborate with cross-functional teams including UX designers, mobile developers, and QA engineers to deliver high-quality products using Agile methodologies.
- Primary code contributor for revamped roaming data usage and buy extra experience in Spark mobile app.
- Mentored junior members of the team and contributed to knowledge sharing within the team.
- Actively participated in code reviews, testing, and deployment activities.

**Institute of Data**                                                  Jul 2022 - Dec 2022
*Assistant Trainer (Part Time)*                                           *Remote, NZ*

- Worked as a part-time assistant trainer after work three times per week for Software Engineering course and mentored students on relevant technical topics.
- Designed and delivered labs on HTML, CSS, JavaScript, React, MongoDB and AWS to facilitate student's understanding on relevant topics.

**Invenco**                                                            Apr 2021 - Dec 2021
*NodeJS developer*                                                        *Auckland, NZ*

- Worked on a multi-tenant SaaS platform that manages IoT devices, utilizing **Node.js** and Angular JS
- Migrated legacy code base from **Java** to **NodeJS**. Improved performance by 60%
- Participated in production deployment and monitoring using tools like **New Relic**
- Supported and mentored junior members of the team

**Crimson Education**                                                  Oct 2019 - Apr 2021
*Full Stack Software Engineer*                                            *Auckland, NZ*

- Delivered multiple multi-locale marketing websites using **React**, **Typescript**, **Gatsby** and StoryBlok (Headless CMS), reducing page load time by 60%.
- Designed and implemented RESTful API and infrastructure solution for custom digital classroom that includes video conferencing and e-learning capability using **Node.JS (Express)** and AWS managed infrastructure with **Terraform**.

- Led development of **Serverless** application on **AWS** using **Serverless** framework that ingest and analyze videos from Zoom cloud and archive in Google Drive
- Collaborated closely with stakeholders to prioritize requirements and led multiple projects at the same time.

**Transportation Operations and Safety Lab, University of Wisconsin Madison**    July 2016 - May 2019
*Software Engineer*    *Madison, WI, USA*

- Utilized **Java**, **JSP**, **JSF**, **Spring**, **Tomcat**, Oracle SQL, JavaScript
- Delivered 511 travel time system, a **Spring** based **RESTful** web application for query and retrieve archived 511 travel time information from database.
- Enhanced real-time traffic exchange **SOAP web services** that aggregated and tracked incidents from different CAD system to IEEE 1512 compliant XML.
- Contributed to Truck Parking Management Information System, a system that used computer vision to provide parking space availability information in rest areas across different state through **RESTful** API.
- Attend stakeholder meetings with WisDOT to offer insights to future features and collect user feedback.
