Job Application for Backend Software Engineer

Dear Sir/Madam,

I am writing to apply for the position at Take2 as a Web Development Curriculum Developer. The opportunity to contribute my passion for programming and technology to Take2's mission is truly exciting. I firmly believe that my skills and experience align perfectly with the responsibilities outlined and the core values of the organization.

Why I Enjoy Programming

Programming has been my passion since I first dabbled in it. The creativity it offers, allowing me to turn ideas into functional solutions, has been incredibly rewarding. Moreover, the challenge of problem-solving and overcoming obstacles has continuously driven my desire to improve and learn. The ability to make a tangible impact through my code and provide innovative solutions to real-world problems brings me immense satisfaction and fulfillment.

Why I Want to Contribute to Take2

Over the past few years, I have dedicated myself to mastering full-stack JavaScript and TypeScript, and these have become my daily tools of choice. My experience in this domain, coupled with my passion for critical thinking and problem-solving, has driven me to assist and mentor junior developers at work. Witnessing their growth and the positive impact of mentorship on their professional development has been incredibly rewarding for me.

Furthermore, having previously worked as an assistant trainer for a boot camp in New Zealand, I have gained deep knowledge and experience that make me well-equipped to meet the responsibilities of this position at Take2. This prior experience has honed my ability to create engaging learning experiences and support learners throughout their educational journey.

In addition, Take2's commitment to making a difference in society through its focus on social impact resonates deeply with me. I believe that technology and programming have the power to transform lives and create positive change, and being a part of an organization that shares this vision is a great opportunity for me to align my professional skills with my values.

I am thrilled about the opportunity to be a part of Take2 and contribute to its valuable work. I am confident that my knowledge of full-stack JavaScript, MongoDB, and GitHub, along with my prior teaching and mentoring experience, make me a strong fit for this role. I am eager to be a part of Take2's mission and positively impact the lives of learners through meaningful learning experiences.

Please find attached my resume for your review. Thank you for considering my application. I look forward to the possibility of contributing to the democratic process in New Zealand and supporting the electoral team.

Sincerely,

Sicong Jiang
